MATERIAL SAFETY DATA SHEET

SECTION 1. IDENTIFICATION

Catalog #: 60-9500-0 (HIV101), 60-9502-0 (HIV101N), 60-9505-0 (HIV102), 60-9505-1
Product Name: HIV 1/2 STAT-PAK® Assay
Synonyms: A qualitative screening test kit for the detection of antibodies to HIV 1/2 in human serum, plasma or whole blood
General Use: The Chembio HIV 1/2 STAT-PAK Assay is a single use, immunochromatographic, rapid, in vitro, qualitative test which uses a combination of antigens to detect antibodies to Human Immunodeficiency Virus Type 1 (HIV-1) and Type 2 (HIV-2) in serum, plasma or whole blood. The Chembio HIV 1/2 STAT-PAK Assay is intended for use as a point-of-care test to aid in the diagnosis of infection with HIV-1 and HIV-2. This test is suitable for use in multi-test algorithms designed for the statistical validation of rapid HIV test results. When multiple rapid HIV tests are available, this test should be used in appropriate multi-test algorithms.

Manufacturer: Chembio Diagnostic Systems, Inc.
3661 Horseblock Road, Medford NY 11763

Emergency Phone: 1-800-327-3635

SECTION 2. HAZARDS IDENTIFICATION

| Preparation/Substance: Components contributing to the Hazard: Sodium Azide |
|---------------------------------|-------------------|-------------------|-------------------|
|                  |       | GHS Signal Word | EC Hazard Symbol | R&S Phrases     |
| 0.2%            | 26628-22-8 | Warning       | Xn               | R25            |
|                 |         |                |                  | R32            |
|                 |         |                |                  | R52            |
|                 |         |                |                  | S23            |
|                 |         |                |                  | S24/25         |
|                 |         |                |                  | S29/35         |

Hazard Statements:
H302: May be harmful if swallowed
H315: May cause skin irritation
H317: May cause an allergic skin reaction
H319: Causes serious eye irritation
H332: May be harmful if inhaled
H334: May cause allergy or asthma symptoms or breathing difficulties if inhaled
H412 : Harmful to aquatic life with long lasting effects
EUH 208: Contains ‘gentamicin sulfate’. May produce an allergic reaction
EUH032: Contact with acids liberates very toxic gas
Precautionary Statements:
P261: Avoid breathing dust/fume/gas/mist/vapors/spray
P262: Do not get in eyes, on skin, or on clothing
P273: Avoid release to the environment
P280: Wear protective gloves/protective clothing/eye protection/face protection
P332, P313: If skin irritation occurs: Get medical attention
P342, P311: If experiencing respiratory symptoms: call a poison center or doctor/physician
P391: Collect spillage

This test kit should be used only by qualified personnel trained in laboratory procedures and familiar with their potential hazards. Specific warnings are given in the instructions for use. The absence of a specific warning should not be interpreted as an indication of safety.

SECTION 3. COMPOSITION / INFORMATION ON INGREDIENTS

Test Device: A membrane strip containing antigens reactive to HIV-1 and HIV-2 with a colloidal gold detection conjugate housed in a plastic cassette. NOTE: this kit does not contain any live or active levels of HIV-1 or HIV-2.

Running Buffer: 3.5 mL dilute buffer solution in a screw-cap closed plastic bottle.

Running Buffer | **Contains:** Sodium Phosphate Dibasic (7558-79-4), Sodium Phosphate Monobasic (7558-80-7), Sodium Chloride (7647-14-5), Sodium Azide (26628-22-8), Avidin (1405-69-2), Tween 20 (9005-64-5), Sodium Hydroxide (207-838-8).
--- | ---
Appearance: | Off-white solution
Odor: | Slight odor
pH: | ~9
Specific gravity: | ~1
Water solubility: | Miscible
Boiling point: | ~100°C

**Running Buffer Concentration:** Contains 0.01-0.1% concentration or less of the following chemicals: Sodium Phosphate Dibasic, Sodium Phosphate Monobasic, Sodium Chloride, Avidin, Tween 20, Sodium Hydroxide.

Contains 0.2% Sodium Azide. Contains 0.125% Gentamicin Sulfate.

The mixture may cause skin and/or eye irritation upon contact in highly sensitive individuals. The material and its container should be disposed of in a safe way and in accordance with Local, State and Federal Regulations. No known or anticipated adverse health hazards are likely for the small amount of chemical mixture provided in the buffer. Utilize Good Laboratory Practices.

### SECTION 4. FIRST AID MEASURES

**Inhalation:**
If inhaled, move to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration and immediately seek medical attention.

**Ingestion:**
If the patient is conscious, wash out mouth with water, give one or two glasses of water or milk to dilute immediately. Get immediate medical attention.

**Skin Contact:**
Take off all contaminated clothing immediately. Wash off with soap and plenty of water. Wash contaminated clothing before re-use.

**Eye Contact:**
Check for, and if possible, remove contact lenses. Rinse immediately with generous amounts of water, adequately flushing by separating the eyelids with fingers, for at least 15 minutes. If exposure symptoms develop, seek medical attention.

### SECTION 5. FIRE FIGHTING MEASURES

**Flash Point:**
No method used

**Flammable Limits:**
LEL: Not Applicable, UEL: Not Applicable

**Special Fire Fighting Procedures:**
It is always best to wear a self-contained breathing apparatus. Use whatever is required in the surrounding area for extinguishing fires.

### SECTION 6. ACCIDENTAL RELEASE MEASURES

**Spill/Leak:**
Avoid creating dust or direct contact with skin, eyes, mucous membranes and clothing by wearing appropriate lab Personnel Protective Equipment (PPE), including gloves, lab coat or apron and eye/face protection (goggles). In the event of a hazardous material spill, contain the spill if it is safe to do so and immediately move to a safe area. Isolate the hazard area and ventilate if appropriate. Ensure that appropriate spill cleanup materials and PPE are available. Wear chemical resistant rubber gloves and a laboratory apron.
Exercise appropriate precaution to avoid direct contact with skin or eyes. Take up with absorbent material. Wipe up area with a damp paper towel and place in a biohazard container. Disinfect spill area with a 10% bleach solution. Dispose as biohazardous waste

SECTION 7. HANDLING AND STORAGE
Handling: The individual kit components within the test kit should be handled only by qualified personnel. Utilize Good Laboratory Practices and safety guidelines for handling chemicals and other hazards. Wear appropriate Personnel Protective Equipment (PPE), including gloves, lab coat or equivalent and eye/face protection. Avoid splashing, spills and the generation of aerosols.

Storage: Store at 8-30°C. No special storage precautions required. NOTE: the handling and storing of the packaged kit should not pose any threat to the shipper. If the product integrity is in question due to excessive damage, utilize proper safety procedures and handle using appropriate PPE.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION
Ventilation: Use general room ventilation.
Respiratory Equipment: None required.
Protective Gloves: Wear standard laboratory protective gloves. Replace torn or punctured gloves promptly.
Eye Protection: Wear standard laboratory safety glasses. Contact lenses should not be worn in the laboratory.
Skin and Body: Wear appropriate body protection, including but not limited to closed toe shoes, laboratory coat or equivalent.
Comments: Standard biohazard precautions should be employed when using serum, plasma or blood samples.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES
Available Physical/Chemical Properties and Characteristics are listed in Section 3.

SECTION 10. STABILITY AND REACTIVITY
Stability: The product is known to be stable under normal use and storage conditions
Conditions to avoid: Avoid excessive heat, maintain ambient temperatures.
Running Buffer: Avoid strong acids, bases, oxidizers and organic compounds. Avoid water and solid metals (aluminum, mercury, copper, lead, zinc) as contact may generate toxic gas.

Hazardous Decomposition Products: May emit toxic fumes under normal fire conditions. Sodium Azide can react with heavy metals to form explosive azides.
Incompatible Materials: Sodium Azide has been known to react with lead or copper plumbing. Do not dispose of Sodium Azide or other chemicals down the drain.
SECTION 11.  TOXICOLOGICAL INFORMATION

Acute:   This product is not known to have any specific health or toxological effects if used as offered for its intended purpose.
Chronic:  None known if used as offered for its intended purpose.
Comments: Individual chemical toxological information has been provided in Section 3.

SECTION 13.  DISPOSAL CONSIDERATION

Method: Disposal of hazardous wastes, product or packaging must be conducted in accordance with all applicable Local, State and Federal Regulations. Processing, use or contamination of the kit components may change waste management requirements and options. Contact the authority having jurisdiction for your area for specific disposal requirements.

SECTION 14.  TRANSPORTATION INFORMATION

This product must be shipped in accordance with all applicable Local, State and Federal Regulations. As offered for shipping (based on single kit only):
DOT: Not a dangerous good.  
IMDG: Not a dangerous good.  
IATA: Not a dangerous good.
Considerations: Processing, use or contamination of the kit components may change shipping requirements and options.
